

NICK AIRDRIE

Senior Full Stack Software Engineer

Toronto, ON · 416 985 8201 · nick.airdrie@gmail.com · nairdrie.com

SUMMARY

AI-native full-stack engineer with 8+ years carrying products from prototype to production at scale. Founder of Keystone Web Design, where I ship LLM-powered features to real paying users end-to-end, and Senior Engineer at Vretta on a platform serving millions of students. Deep across React/TypeScript, Node.js, and SQL, with a product-owner mindset, strong UX instincts, and a habit of raising the team's bar through code review and mentorship.

TECHNICAL SKILLS

Frontend: React / React Native, Next.js, TypeScript / JavaScript, Angular, responsive UI/UX & SEO-optimized web, CSS / Sass

Backend & Data: Node.js (Express / Hono), REST API design, MySQL / PostgreSQL, complex SQL & query optimization, Redis, Python

AI & LLM: Production LLM integration (Anthropic, OpenAI), RAG & vector search, agentic workflows, prompt engineering, AI-assisted development (Claude Code, Copilot)

Infrastructure & DevOps: AWS, Docker, Firebase, CI/CD pipelines, Git, authorization & access-control flows, Stripe API & webhooks

PROFESSIONAL EXPERIENCE

Founder & Lead Engineer | Keystone Web Design

2024 – Present

All-in-one, AI-integrated website builder and management platform for Canadian small businesses.

- Architected a multi-tenant SaaS **end-to-end in TypeScript** (React / Next.js, Node, MySQL, AWS), carrying it from prototype through beta to production-grade as the sole builder.
- Integrated LLMs into real customer-facing workflows:** AI site generation produces branded copy, layouts, and SEO-optimized pages, with guardrails so nondeterministic output ships reliably instead of just demoing well.
- Built a **RAG-backed assistant** letting non-technical owners manage content, bookings, and customer inquiries in plain language, cutting support requests ~60%.
- Implemented **Stripe subscription billing** with webhook-driven provisioning and access control; grew to 40+ paying SMB clients at 95%+ annual retention.

Senior Software Developer – Full Stack | Vretta Inc.

2020 – Present

- Scale & architecture:** Architected and maintain a secure e-assessment platform serving millions of students across Canada, with Node.js services absorbing high-concurrency spikes during standardized testing windows.
- Feature leadership & mentorship:** Led end-to-end scoping and delivery of real-time performance-insight tools used by thousands of teachers and provincial ministries; mentor junior engineers and raise the bar through code review.
- AI adoption:** Built internal LLM agent tooling that auto-generates daily engineering status reports from git activity, streamlining team reporting.
- SQL & optimization:** Wrote and optimized complex SQL queries (including pivoted reporting over large student datasets) and tuned API responses for hundreds of thousands of concurrent users.

Web Application Developer – Full Stack | Kenna Technology Solutions Inc.

2019 – 2020

- Developed and enhanced a global sales portal that operationalized commercial relationships, equipping worldwide sales teams to manage long-term clients and deliver timely product support.

Mobile Game Developer | Adknown Inc.

2018

- Independently designed, built, and shipped 12 cross-platform iOS/Android games (50,000+ downloads), owning the full lifecycle from concept through monetization and app store optimization.

INDEPENDENT PROJECTS

Member Portal & Payments Integration | Canadian Association of Paediatric Nurses

2023 – 2025

- Architected a secure membership payment system on the **Stripe API**, with webhook automation that syncs member access state to MySQL and triggers onboarding; built a custom admin portal for self-serve content and event management.

Founder – Fridgie | Realtime Collaborative Meal Planner

2025

- Designed and built a cross-platform mobile app (React Native, Hono, Docker) with a decoupled backend architected for AI-driven meal suggestions and group collaboration.

EDUCATION

Bachelor of Engineering, Honours Program, Computer Engineering | University of Guelph, Guelph, ON

2015 – 2020
